

Engraving & Machining Services

INDUSTRIAL ENGRAVING SERVICES INCLUDING:

- ▶ ALUMINIUM PANELS
- ▶ SUB-RACKS & CHASSIS
- ▶ DIECAST ALUMINIUM ENCLOSURES
- ▶ PLASTIC LABELS

For first-class professional results built on experience, attention-to-detail and an enthusiastic and responsive approach to customer service

Services include:

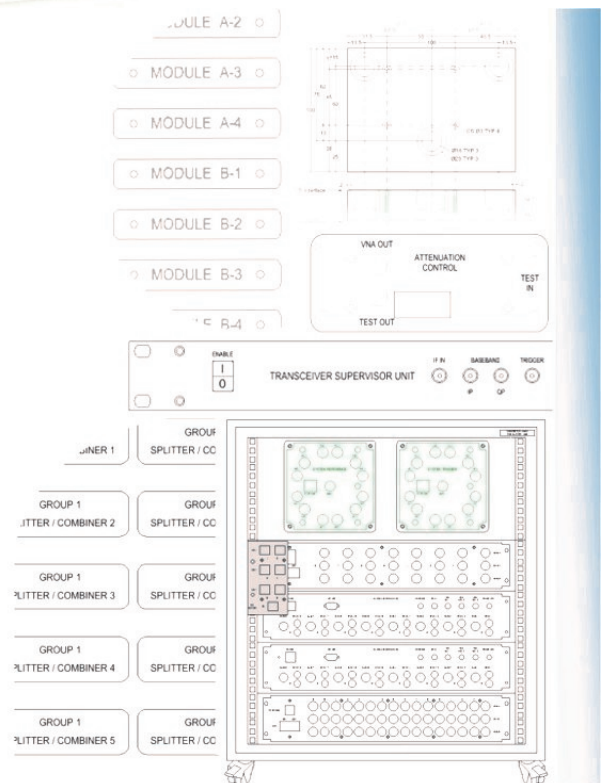

- Machining and engraving aluminium panels for sub-racks and chassis
- Machining and engraving diecast aluminium enclosures
- Plastic labels
- No minimum quantity
- Prototypes and one-offs a specialty
- We accept a wide range of CAD formats
- We can provide CAD services to create or modify drawings

Genesis Software designs and manufactures electronic instruments for scientific applications and we have established in-house production facilities

for rotary engraving and machining of panels and enclosures. Our own

needs demand first-rate, professional results and fast turnaround for both production and prototyping. We are therefore

well-positioned to understand the needs of the electronics industry and deliver top quality results. Our enthusiastic and skilled team aims to exceed your expectations!
